

GLOBAL WARMING SOLUTIONS AND THE PATH TO RECOVERY

DAVID FOSTER

Executive Director, Blue Green Alliance

ABSTRACT

We will look back on the last year as a period when extraordinary economic events marked the unraveling of one economic model and placed in front of the global community a set of choices. Either we restructure the architecture of the global economy and replace it with something else, or we face a future of devastating economic consequences. The Blue Green Alliance has become one of America's leading advocates for global warming solutions and we believe that the benefits and economic opportunities will far outweigh the costs.

We have popularized the terms “green economy” and “green jobs” and we believe that every job in America should turn into a green job.
